

Sprint delivery evidence

A concise evidence record supporting the employee's self-assessment.

EMPLOYEE	ROLE	TEAM
Sam Perera ALT006	Software Engineer	Information Technology
EVIDENCE PERIOD	7-22 September 2026	

01 / DELIVERY RECORD

The example below models a two-week sprint board and release handoff. References are illustrative and are not links to actual tickets or pull requests.

APP-241	Employee directory search Delivered a filter for active employee profiles; added empty-result and access checks.	COMPLETED
APP-247	Work-email validation Added domain and duplicate-email handling; documented negative test cases.	COMPLETED
APP-253	Deployment health visibility Added a release checklist and basic monitoring notes for the team handoff.	PARTIAL

02 / QUALITY SNAPSHOT

11/11	6/6	0
automated checks passed	manual regression cases passed	open release blockers

Sample test run: 22 September 2026. Covered directory filtering, validation failures, profile access and release smoke checks. The monitoring dashboard integration remained open for the next sprint.

CANDID DELIVERY NOTE APP-253 was only partially completed because production-like monitoring access was unavailable. The checklist and handoff notes were delivered; dashboard verification was carried forward rather than reported as complete.

DEMONSTRATION SAMPLE

Fictional training data - not a live company record

How this supports the review

A practical guide to attaching and discussing this evidence during the demo.

03 / TEAM CONTRIBUTION

- **Code review** Reviewed two teammate changes, flagged a missing inactive-profile edge case, and checked the fix before merge.
- **Delivery coordination** Raised the monitoring-access dependency at the daily stand-up, then agreed a smaller shippable handoff.
- **Knowledge sharing** Walked through the release checklist with a teammate and added a short troubleshooting note.

04 / MATCH TO PERFORMANCE ITEMS

Reliable application features APP-241 and APP-247; quality snapshot and release smoke checks.

Collaboration Code review, stand-up escalation and team handoff.

Sprint delivery Two completed items; one transparently carried forward.

Monitoring knowledge Release checklist and troubleshooting note; dashboard verification pending.

05 / EMPLOYEE REFLECTION

I delivered the agreed directory and validation changes, and verified their main paths before handoff. I helped the team catch an inactive-profile edge case in review. The monitoring work was not fully verified because access was delayed, so I documented the remaining check and will complete it next sprint.

DOCUMENT STATUS

Prepared solely for a product demonstration. No manager approval, system export or real employee achievement is implied. Replace with genuine ticket, test and review records for an actual submission.
